

Auction Guide: Step-by-Step Instructions for Participation

This guide is designed for those who have never dealt with crypto or NFTs and for those who are participating in such auctions for the very first time. We understand that the world of digital assets can feel overwhelming at first, so we've created a simple, step-by-step walkthrough to make the process as easy as possible. Whether you're completely new to this or just need a little extra help, we're here to support you every step of the way.

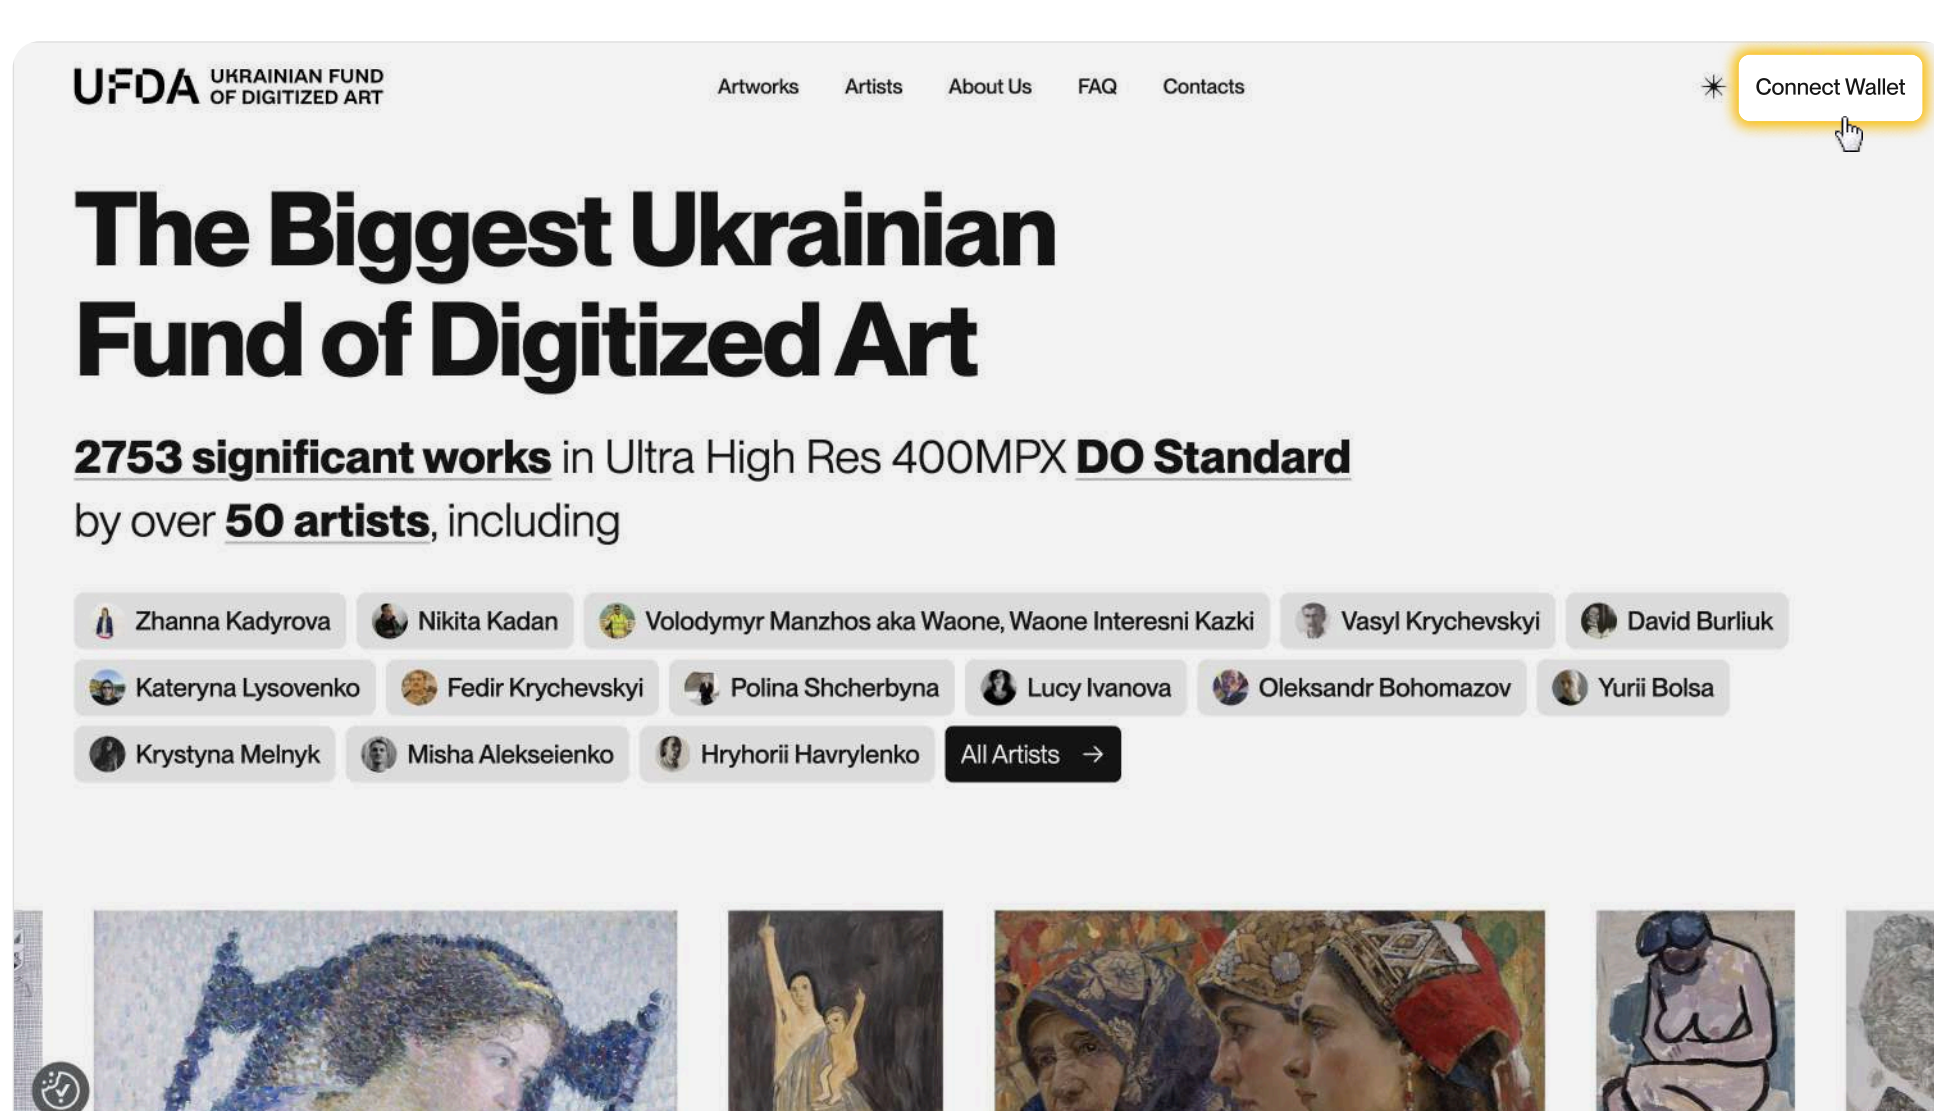

1. If you don't have a crypto wallet, **please pick an ERC-20 compatible wallet like MetaMask or Trust Wallet, set it up, and don't forget to save the recovery phrase.** It's crucial to keep it safe and private. Do not share your recovery phrase with others, as doing so could put your account and funds at risk.

2. **Fund your crypto wallet with USDC and Ethereum (ETH)** for transaction fees. If you use MetaMask then you can **do it right in your wallet.** You must have an amount bigger as an artwork price +100 USDC for the storage fee for a century.

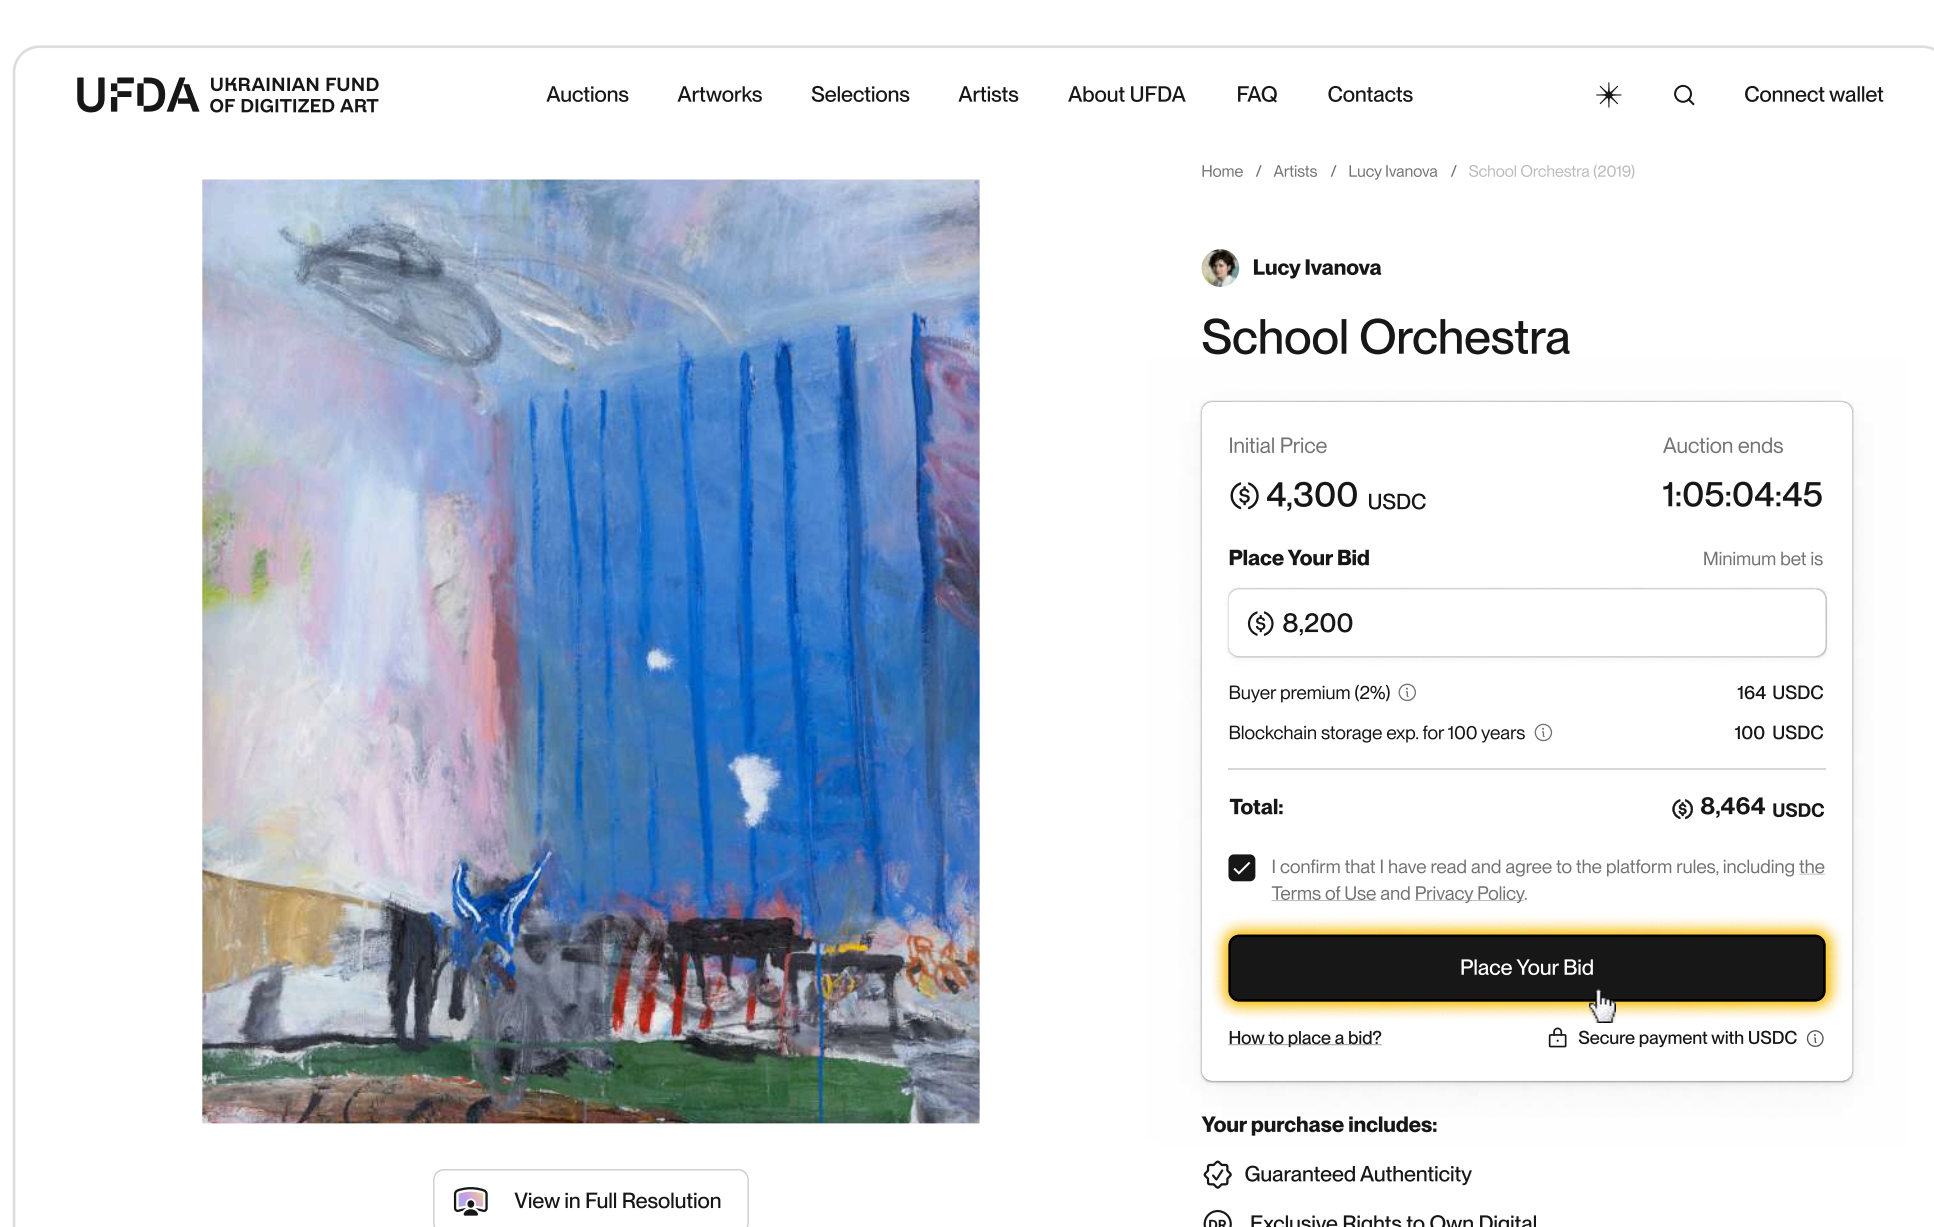

1. **Connect your ERC-20 crypto wallet** (e.g., MetaMask) funded with ETH or USDC. Click **“Connect Wallet”** on the top of the page and follow the prompts in your wallet interface.

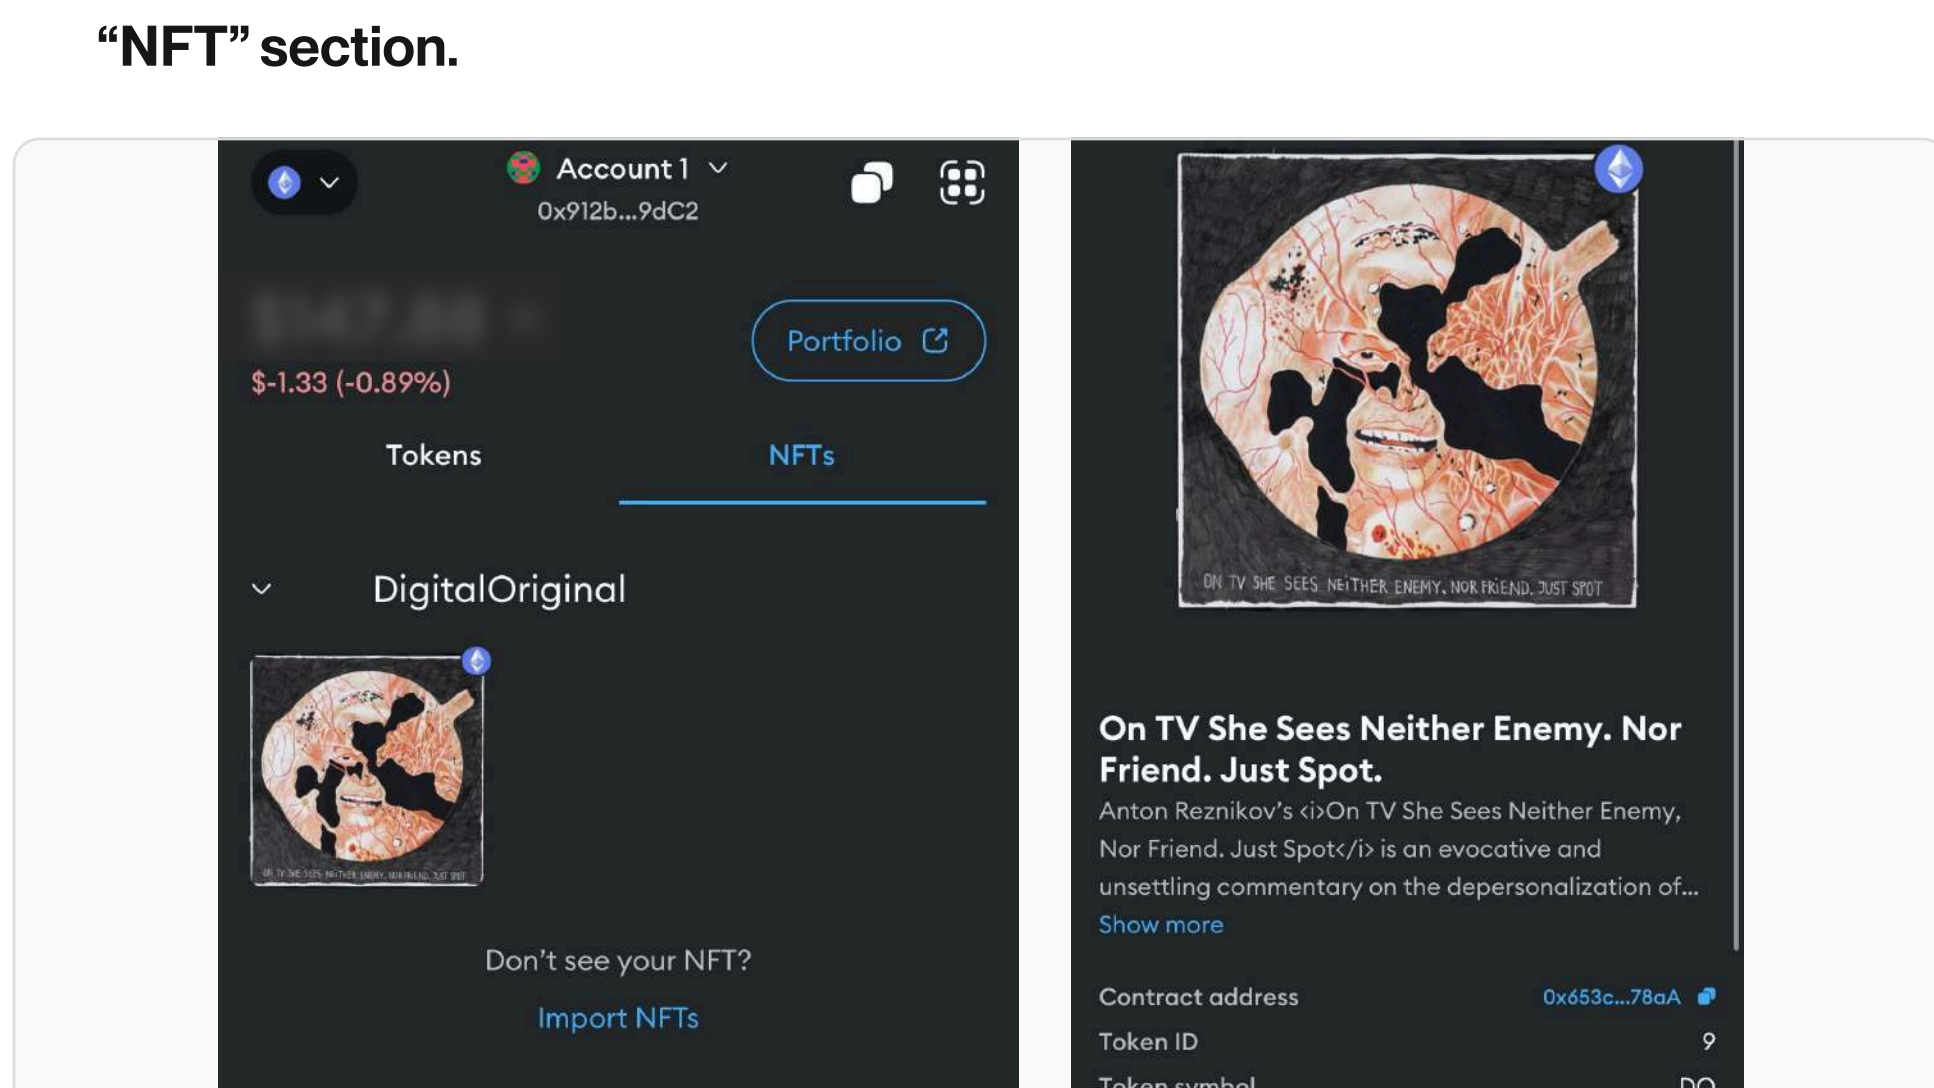

2. **Explore available auction listings** and review details (starting bids, duration, artwork information).

3. **Place a bid**, ensuring it exceeds the previous bid by the specified increment. Pay the required amount plus the additional fees (e.g., buyer's premium).

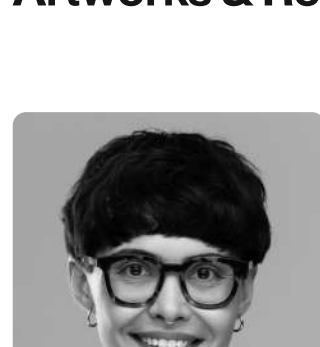

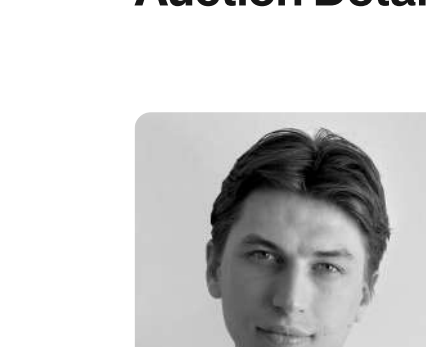

4. **Confirm** the required transactions in your crypto wallet.
5. **Track your bid status** and receive notifications if you're outbid. Place higher bids if needed.
6. At the end of the auction period, if you win, the **Digital Original will be automatically transferred to your wallet.**
7. After blockchain confirmation, the **Digital Original will appear in your wallet in “NFT” section.**

Be sure to check out our **FAQ section**, where you may find answers to commonly asked questions.
